

Structural & Mediator Lipidomics

Filesize: 3.06 MB

Reviews

It is one of the most popular pdf. It really is full of knowledge and wisdom. It has been developed in an exceptionally easy way and it is just right after I finished reading through this publication by which it really altered me, altered the way in my opinion.

STRUCTURAL & MEDIATOR LIPIDOMICS

DOWNLOAD

Presses Polytechniques et Universitaires Romandes. Hardback. Book Condition: new. BRAND NEW, Structural & Mediator Lipidomics, Michel Lagarde, Nathalie Bernoud-Hubac, Celine Costaz, Frederic Carriere, Michel Guichardant, Lipidomics is the part of metabolomics dedicated to lipids. It can be defined as the full molecular characterization of the lipid component in a defined system, as well as consideration of their function when available. Their recent development has led experts in the field to distinguish between different subdomains, like structural or mediator lipidomics, in an attempt to simplify the data and decrease the complexity of their interpretation. In this book, the authors present lipid molecular species, which have been well defined for their biological activities, whatever the biological system involves, with reference to the closely related structural lipids. The emphasize bioactive lipids issued from membrane lipids, especially polyunsaturated fatty acid derivatives produced through various oxygenation processes. They also cover enzymes associated with the production of these bioactive lipids and receptor proteins relating to their action. As the methodological aspects are crucial considerations in characterizing the various lipids, the most common methods in use are depicted, together with a dynamic approach to evaluate the fluxes between the bioactive molecules, and the attempt to visualize the lipids in their membrane superstructures.
