paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Publisher: Science; 1st edition (August 1. 2004) This book is developed by the Ministry of Education in 1999. higher vocational education foundation courses teaching the basic requirements and Vocational education professionals to the training objectives and plan to guide the preparation of the main line to the theoretical system of high school and college physics textbook. pay attention to the convergence of the junior high school physics textbook. Age characteristics of the book for junior high school graduates. reducing the theoretical depth and problem difficulty. to avoid the complexity of the theoretical derivation and proof. to increase the number of examples and exercises. In addition. the book also increased the physical application of knowledge in engineering and everyday life. an increase of the content of new science and technology related to the physical. The book is available as a five-year vocational. physical course materials of various types of vocational college students. Contents: Chapter 8 static field of 8.1 Coulomb's law 8.2 the electric field strength of the electric field lines 8.3 electric potential electric potential difference 8.4 uniform strong electric field. electric potential difference and electric field strength of the relationship between 8.5 charged particles in uniform electric field sports 8.6 capacitor capacitance of 8.7 electrostatic field conductor static shielding the high-voltage live working of the reading material reading materials reading material harm to the static and constant application. Chapter 9 9.1 Current part of the electric current Ohm's law 9.2 resistance laws of physics and high-tech superconducting technology 9.3 resistor series-parallel DC Bridge 9.4 electric power electricity power Joule's law physicist Joule 9.5 electromotive force. Ohm's law to read Chapter 10 Magnetic Field 10.1 magnetic...
